

Communiqué Audio Conferencing Services

The affordable alternative to business as usual

Communiqué Audio Conference Calling service is feature-rich with high-quality audio and moderator controls that enable you to conduct scheduled or on-demand conference calls ranging from small staff meetings to large investor relations calls.

Convenience

Our conferencing services are easy-to-use allowing participants to connect to meetings through friendly and knowledgeable operators or by dialing into meetings directly. Plus, there are several options to set up calls. Setting up calls with a reservation takes minutes with secure online reservations, 24-hour toll-free call-in and fax reservation service. Or use our convenient reservationless conferencing service. It's like having your own personal calling card for conference calls.

Flexible Billing and Reporting

We make expense tracking and charge back easy by offering alphanumeric accounting codes and several invoice sorting and separation options.

Customized Solutions

At Communiqué, we believe that understanding and fulfilling the needs of our customers is our first priority. We realize that not all of our services are necessary for every company, which is why we will work with your company to assess your unique needs.
