

LEADER-VIEWSM

Think about your high-profile conference calls. Would you like the ability to see which participants are on the call before you start your conference? How would you like to know which guests are waiting to ask questions and be able to prioritize the order in which they are taken? Leader-ViewSM allows you to do all that and more! With Leader-View,SM you can call the shots on every call – the result: a professional, well-managed and secure meeting.

Leader-View'sSM simple web-based conference interface gives you a private, real-time view of your call's participant information. Everything you need to know is on your screen and at your fingertips. Respond quickly, make better decisions with more information and keep meetings moving – all with a few clicks of your mouse.

▶ **USE LEADER-VIEWSM WITH YOUR LARGE, HIGH PROFILE EVENTS**

Investor Relations Calls – Manage your conference attendance and Q&A session in full compliance with RegFD.

Product Launches – Make sure all of your important participants are present before breaking the big news.

Press Conferences – Prioritize your Q&A queue to ensure that key questions are taken first.

Distance Learning Sessions – Keep track of who left the call early for later follow-up on issues that were missed.

▶ **VALUE-ADDED LEADER-VIEWSM FEATURES**

Participant List – Access participant information in real-time. You'll see who's in the audience and observe when key participants arrive.

Q&A Queue – View the name of the person currently asking a question and see those who are waiting in queue for their turn. Use the queue list to help gauge how much time you'll need to allow for questions.

Total Participants – Keep tabs on your audience using the real-time tally of how many participants have dialed in for the call.

List Sort Options – Sort participants' names, their additional information and their connection status within the Participant List and Q&A Queue screens.

Q&A Queue Control – Advance a participant to the current questioner position, move participants up and down within the queue to prioritize the order questions are taken or delete participants from the queue entirely.

Chat – Conduct a private chat conversation with your call's lead Operator by exchanging text-based messages during the conference call.

List Download – Download the Participant List at any time during your conference call. Provides a record of who was on your call that makes an ideal follow-up list.

Polling Window – Request this option when making your reservation and you will be able to view the results from your audio polling questions online.
